## MS-2173

# Preface

Dear users:

We're pleased to present our MS-2173, a replacement of all treatment programs in beauty salons. It covers all the treatment from head to foot with magic effect and replaced manual treatment. MS-2173 is a specialized device for professional use, which needs to be handled by professionals with proper training. Any improper use will result in adverse outcomes. Therefore, we advise any personnel to read this guide thoroughly and follow the instructions strictly before operation.

We believe our quality product will bring in good returns on your end. Also, you can count on our worry-free after-sales service.

Thank you!

# Part I

## Brief Introduction

Health maintenance machines replace the traditional programs in beauty salons, which covers all treatments from head to foot, such as facial lifting, eye bags, neck and shoulder strain, shaping breasts, prevent sagging, slimming, buttock lifting, improve constipation, stomach cold, womb cold, private part care, and body-shaping with magic effects. It replaces the traditional manual treatments, such as scrapping, massage, cupping, tuina, channels, and dredging meridians with safety treatments. This equipment requires no injection, no medication, no operation, thus having no side-effects. Vacuum health maintenance machine actively treat the breasts with suction to massage them and dredge meridians.

## Advantages

1. Multifunctional beauty machine. Select modes subjecting to different needs.
2. Easy and convenient; painless, non-invasive during the process; skipping any recovery periods without affecting any work and life plans.
3. It solves problems like fatigue, sore, flat breasts, etc.
4. Strong vacuum pump, less noise, different modes. Breast cups designed according to human body, comfortable and high quality.
5. Grease cups are for scrapping, petechiae, and removing fat, dispelling detoxification, dampness.
6. Wider treatment range and faster and more visible effects with low cost and high returns.
7. Easy and convenient; painless, non-invasive during the process; skipping any recovery periods without affecting any work and life plans.
8. Different vacuum cups for different needs.

## Facial Care

### Working Principles

#### Vacuum Cup: Face

Use vacuum suction head directly on the facial skin to achieve deep cleansing effect. (Vacuum/negative pressure: lower than normal pressure, the use of negative pressure is very common. People often make a part of the space appear negative pressure so we can use the ubiquitous atmospheric pressure. For example, when people breathe, negative pressure occurs when the lungs are in the expansion state, forming a pressure difference between the inside and outside of the lungs. Fresh air is pressed

into the lungs.) Negative pressure cleaning is the use of such a principle in the state of no pain, deep cleaning pores of black head, white head, oil, and dirt residue.

## **Grease Cup**

Massage the skin and muscles by special negative air pressure suction, which can effectively improve the fluid flow of cells, increase the movement of cells, activate cells, increase skin elasticity and reduce fine lines. Vacuum negative pressure movement can stimulate the surface and deep sympathetic nervous system, improve skin sensitivity and skin immunity.

## **Effect**

1. Unclog pores.
2. Deep clean skin.
3. Shrink large pores.
4. Improve dull skin and fine lines.
5. Improve skin hyperpigmentation.
6. Accelerate removal of dead skin cells.

## **Applicable Range**

1. Those who has excessive secretion of sebum and thick stratum corneum.
2. Those with rough skin and large pores.
3. Those with clogged pores.
4. Those with dull and glowless skin.
5. Those with skin laxity and sagging.

## **Inapplicable Range**

1. Those with severe sensitive skin or is having an allergic reaction.
2. Those with large wounds.
3. Those with skin diseases and other infectious diseases.
4. Those who have just undergone injections, such as hyaluronic acid, intradermal injection, wrinkle removal or other plastic surgeries.
5. Those who are pregnant or has severe heart disease, hyperlipidemia, hypertension, hyperglycemia or other serious diseases.

## **Notes after Operation**

1. Avoiding excessive exposure to the sun and keep skin hydrated.
2. Use sun protections and moisturizers.
3. Avoid using facial scrub, exfoliant, AHAs or other irritant skin care products.
4. Avoid smoking, drinking and staying up late; eat more vegetables, fruits and less

greasy foods.

5. Apply one facial mask in the first 3 days of treatment.

Wash face with lukewarm water in the first 3 days.

## Back Lymphatic Drainage

### Working Principles

#### Grease Cup

Through special negative pressure suction head on the skin, and muscle massage can effectively improve the cells in the body fluids liquidity, increase cell movement can activate cells to improve the effect of skin elasticity, at the same time, accelerate the blood circulation of imperceptible blood-vessel, excess toxins through the normal cycle of the lymphatic system, and reduce and improve the dark spots and hyperpigmentation of body, as well as stasis. The suction and discharge of air pressure can not only improve the capillary system, but also improve the flow between the deeper veins and the network of lymph glands, strengthen the blood vessels, and improve varicose veins.

#### Cupping

Scrapping and cupping are from the inside to the body surface, and finally distribute from the body surface. The stimulation during scraping promotes the circulation of qi and blood around the body, which in turn benefits the circulation of qi and blood throughout the body. Cupping, like acupuncture, is also a kind of physical therapy, and it is one of the best physical therapy, which uses negative pressure to make it attracted to the skin, causing congestion. Cupping cups are placed on the treatment area or acupuncture point, by doing which can slowly suck out symptoms of moisture, meanwhile promote local blood circulation, thus achieving the purpose of pain to restore function, such as clearing dampness, hotness and coldness, dredging meridians, activating blood and qi, reducing swelling and pain, detoxicating, adjusting the body balance of Yin and Yang, relieving fatigue, enhancing physique and so on.

#### Effect

1. Accelerate lymph flow.
2. Accelerate natural detoxication, and help rid the body of waste through the lymphatic system.
3. Stimulate activity in the lymphatic area.
4. Increase lymphocyte production.
5. Boost your metabolism.
6. Boost your immune system.

## **Applicable Range**

1. Those who experience neck and shoulder strain.
2. Those with symptoms of peri-arthritis of shoulders.
3. Those who experience soreness and pain of muscles.
4. Those who experience nervous breakdown, insomnia, and dreamful sleep.
5. Those who drive, sit before computer screen, or just sit for long hours.

## **Inapplicable Range**

1. Those with hypertension, hyperlipidemia, hyperglycemia and heart disease.
2. Those whose wounds are yet to be healed or recovering from a surgery.
3. Those who are in pregnancy, menstruation, and lactation.
4. Those who have skin diseases or other infectious diseases.
5. Those who appear to have lymphoma or cancer.
6. Those who are drunk, overworked, or too thirsty; those with a full or empty stomach.

## **Notes after Operation**

1. Avoid taking a shower in 4-6 hours and getting cold (capillary vessels are dilated after treatment).
2. Avoid scratching treatment areas whereon pain, pruritus, formication, or rubella was felt. The above symptoms are within the normal range.
3. Drink more lukewarm water to help with digestion.

# **Breast Enlargement**

## **Working Principle**

### **Vacuum Cup: Breasts**

Use vacuum negative pressure on the human body by special tools in the breast through the instrument internal negative pressure attraction, in the breast produce different rhythm of the negative pressure, make the breast relatively larger, achieve the effect of increasing the breast. The negative pressure in the cup can make local capillaries congested, stimulate organs, enhance cell vitality, promote functional activities, and improve the body's resistance; Negative pressure mechanical stimulation, through the reflex pathway to the central nervous system, can regulate the balance of neural activity. The inhalation and exhalation of air and negative pressure in the operation increase and disappear replacement, make the local pores continue to open and close, promote the skin to breathe, increase its oxygen intake, speed up the elimination of waste. It has the effect of warming channels and

collaterals, promoting qi and blood circulation, removing blood stasis and swelling, removing poison and exorcising evil. Combined with deep massage, it makes the blood and gas unblocked, unclogs the breast acinus, drives the invisible gas to the tangible blood, transports oxygen and nutrition to the breast, and stimulates the pituitary gland to secrete female hormones, strengthens the breast connective tissue, and stimulates the breast development and growth. Promotes uterine contraction, tightens skin elastic fibers, and prevents loose and scattered skin tissue.

## **Effect**

1. Alleviate breast relaxation, Reduce chest expansion.
2. Improve premenstrual breast swelling and soreness.
3. Unclog and straighten breasts.
4. Prevent lactoceles.
5. Prevent breast cancer.
6. Shape up your breasts.

## **Applicable Range**

1. Those with breast relaxation.
2. Those with breasts laxity and sagging.
3. Those with asymmetrical, and east west breasts; those with a flat chest.
4. Those who have inverted nipples and look for a change; those with breast nodule, mammary hyperplasia; those who experience breast pain.
5. Those who feel they have insufficient mammary gland development; those who suffer from postpartum mammary gland atrophy.

## **Inapplicable Range**

1. Those who are in pregnancy, menstruation, and lactation.
2. Those who have hypertension, hyperlipidemia, hyperglycemia and heart disease.
3. Those with serious mammary hyperplasia, fibromatosis and cysts.
4. Those with infectious breast skin.
5. Those have had undergone surgeries on breasts.

## **Notes after Operation**

1. Drink more lukewarm water and stay warm.
2. Wear comfortable bra with support; avoid squeezing breasts.
3. Avoid getting cold (it's advised not to go out in windy days.); take showers 4-6 hours after the treatment.

# Buttock Augmentation

## Working Principle

### Vacuum Cup: Buttocks

The negative pressure in the cup can make local capillaries congested, stimulate organs, enhance cell vitality, promote functional activities, and improve the body's resistance; Negative pressure mechanical stimulation, through the reflex pathway to the central nervous system, can regulate the balance of neural activity. The inhalation and exhalation of air and negative pressure in the operation increase and disappear replacement, make the local pores continue to open and close, promote the skin to breathe, increase its oxygen intake, speed up the elimination of waste. At the same time vacuum cup can help contour buttocks, make excess fat be adsorbed at the due position of buttocks, so that your buttock looks full.

### Effect

1. Relax muscles and increase blood circulation on treatment areas.
2. Prevent muscle atrophy and relieve muscle spasm.
3. Tighten skin and improve your health.
4. Relieve skin sagging caused by muscle relaxation.
5. Stimulate muscle contraction. Build buttock muscles.

### Applicable Range

1. Those with saggy hips and fat accumulation.
2. Those with stretch marks caused by obesity or pregnancy.
3. Those whose butt shape is not good-looking, flat and soft outward expansion.
4. Those with relatively low buttock peak.
5. Those with H-shaped buttocks caused by hip fat accumulation.

### Inapplicable Range

1. Those who are in their menstruation, pregnancy and lactation.
2. Those who have unhealed wounds or are still recovering from surgery.
3. Those who have hypertension, heart disease, etc.
4. Those who have skin diseases, infectious diseases and are in their skin sensitive period.
5. Those who have weak bodies.

### Notes after Operation

1. Shower 4-6 hours after operation.

2. It is advised to wear buttock-lifting underwear to prevent from sagging.
3. Do some butt-lifting exercises after treatment.

## Abdomen Cupping

### Working Principle

#### Cupping

Abdominal cupping is to use external force to open pores so that waste can be discharged through pores outside the body, at the same time for some aging cells also have a certain update. Through the local conditioning can promote local blood and internal circulation to speed up metabolism to achieve the effect of weight loss. According to these principles, cupping the abdomen can reduce the protruding fat on the abdomen. Abdominal cupping can also help with cold, or cold womb and other diseases. It can also regulate the viscera, balance Yin and Yang, improve the immune function.

#### Effect

1. Stomach meridian drainage and detoxification.
2. Help with cold womb and body.
3. Help with digestion and constipation.
4. Tighten skin and prevent saggy skin on stomach.

#### Applicable Range

1. Those who are suffering from bad digestion and constipation.
2. Those who experience cold womb and stomach.
3. Those who have stools.
4. Those who want to lose weight and tighten muscles.
5. Those with abdominal fat accumulation and slow metabolism.

#### Inapplicable Range

1. Those are during menstruation, pregnancy and lactation.
2. Those who are still recovering from surgery or whose wounds are yet to be healed.
3. Those who have heart disease and hypertension, etc.
4. Those who have skin disease, infectious disease or during sensitive skin period.
5. Those who has a weak body.
6. Those who are drunk, full or empty-stomached, thirsty and overworked.

#### Notes after Operation

1. Avoid taking showers within 4-6 hours after treatment.
2. Avoid wearing crop tops or getting a cold.
3. Avoid eating spicy, cold food; drink more warm water.

## Lymphatic Drainage

The lymphatic system is a circulatory system, and the immune system is also the body's defense station and garbage collection station to prevent external bacterial infections and recycling of the body's waste and toxins. Lymph is also the largest body detoxification system, equivalent to the human body's scavenger, is the main body organ toxins collection medium. If lymphatic system circulates decelerate, it can bring about toxin to accumulate inside body, the person can get oedema and fat easily. The principle of lymphatic drainage weight reduction is basically through massage that passes to lymphatic gland and stimulation, unblock lymphatic circulatory system, make inside body toxin education outside the body, accelerate adipose combustion, achieve the goal of reducing weight. Another important function of lymphatic drainage is to clean blood vessels. Lymphatic vessel and vein are intercommunicated. When blood capacity is excessive, lymphatic vessel can have shunt fluid, reduce the effect of the burden inside blood vessels.

The lymphatic system of one person grows along with the age. It's circulatory rate may drop, the action of detoxification also can drop as one age. The circulatory speed of lymphatic system can be accelerated effectively through proper massage, passing toxin outside the body as soon as possible.

## Working Principles

### Grease Cup

Scraping and cupping are from the inside to the body surface, and finally distribute from the body surface. The stimulation during scraping promotes the circulation of qi and blood around the body, which in turn benefits the circulation of qi and blood throughout the body. Cupping, like acupuncture, is also a kind of physical therapy, and it is one of the best physical therapy, which uses negative pressure to make it attracted to the skin, causing congestion. Cupping cups are placed on the treatment area or acupuncture point, by doing which can slowly suck out symptoms of moisture, meanwhile promote local blood circulation, thus achieving the purpose of pain to restore function, such as clearing dampness, hotness and coldness, dredging meridians, activating blood and qi, reducing swelling and pain, detoxicating, adjusting the body balance of Yin and Yang, relieving fatigue, enhancing physique and so on.

### Cupping

Abdominal cupping is to use external force to open pores so that waste can be

discharged through pores outside the body, at the same time for some aging cells also have a certain update. Through the local conditioning can promote local blood and internal circulation to speed up metabolism to achieve the effect of weight loss. According to these principles, cupping the abdomen can reduce the protruding fat on the abdomen. Abdominal cupping can also help with cold, or cold womb and other diseases. It can also regulate the viscera, balance Yin and Yang, improve the immune function.

## **Effect**

1. Speed up the flow of lymph.
2. Speed up the natural detoxification process and help the body remove waste through the lymphatic system.
3. Stimulate the activity of lymphatic domain.
4. Increased lymphocyte productivity.
5. Improve your body's metabolism.
6. Boosts immune system function.

## **Applicable Range**

1. Those whose face lacks luster and whose skin becomes very rough.
2. Those who drink a lot and suffer from insomnia.
3. Those who have excessive fat on waist and abdomen. (Lymphatic detoxification can rapidly improve edema and consuming fat.)
4. Those with bad breath and frequent constipation.
5. Those with poor mental state, poor resistance to cold and illness.

## **Inapplicable Range**

1. Those with "3 Hs" (hypertension, hyperglycemia, hyperlipidemia) and who have heart disease.
2. Those in pregnancy, menstruation or lactation.
3. Those who have just undergone surgical wounds or convalescents.
4. Those with epilepsy and severe diabetes and hyperthyroidism.
1. Those with malignant tumors, hemophilia or severe bleeding.
2. Those with skin diseases and infectious diseases.
3. Those with severe gynecological diseases.
4. Those whose gynecological diseases are being treated.
5. Those with lymphoma or signs of cancer.
10. Those who has a weak body.
11. Those who are drunk, full or empty-stomached, thirsty and overworked.

## **Cautions after Treatment**

1. Shower 4-6 hours after treatment.
2. Avoid heat and cold.
3. Avoid spicy, greasy foods.
4. Drink plenty of hot water to boost your metabolism.
5. Avoid staying up late and smoking.
6. Set the time subjecting to your own situation. (Cupping does not achieve better results the longer you do it.)

## **Body Care: Private Parts**

### **Working Principle**

#### **Vacuum Cups: Private Parts**

The negative pressure in the cup can make local capillaries congested, stimulate organs, enhance cell vitality, promote functional activities, and improve the body's resistance; Negative pressure mechanical stimulation: through the reflex pathway to the central nervous system, can regulate the balance of neural activity. The inhalation and exhalation in the operation, the increase and disappearance of negative pressure replace, make the local pores continue to open and close, promote the skin breathing, increase its oxygen intake, accelerate the elimination of waste and promote the contraction of pelvic smooth muscle, increase blood circulation, regulate the endocrine system, increase lutein and hormone secretion in the body.

### **Effect**

1. Improve vaginal lubrication.
2. Improve vaginal relaxation.
3. Regulate your hormones.
4. Improve the quality and sensitivity of your sex life.
5. Improve the color of the perineum.
6. Discharge vaginal toxins and residual metabolites, restore vaginal cleanliness and balance.

### **Applicable Range**

1. Those who are in pregnancy, birth, abortion, contraception and sexual intercourse.
2. Those with irregular menstruation (dysmenorrhea, less period flow, blood clots).
3. Those with skin spots, acne and dark yellow caused by endocrine imbalance.
4. Those with abnormal leucorrhea and peculiar smell.
5. Those with poor memory and immunity.

6. Those whose sex life isn't compatible.

## Inapplicable Range

1. Those in pregnancy, menstruation or lactation.
2. Those who are recovering from surgery or being treated.
3. Those who have heart disease and hypertension, etc.
4. Those who have skin disease, infectious disease or during sensitive skin period.

## Notes after Operation

1. Shower 4 hours after treatment.
2. Drink plenty of warm water, avoid cold water and eat raw, cold and spicy food.
3. Change and wash underwear daily. The underwear should be made of pure cotton and silk, with less chemical fiber and avoid excessive tight underwear.
4. Towels and underpants should be dried in the sun or boiled with hot water. If dried in a humid environment, it is easy to breed fungus.
5. Don't have sex immediately after you're done.

# Part II

## 1. Detailed Operation

The installations are as below:

Power Cable Receptacle

Power Button

Inlet Hole

Plug the other end of the rubber hose into inlet hole,

the other two ends

into two vacuum cup/breasts enhancement cups  
the port.

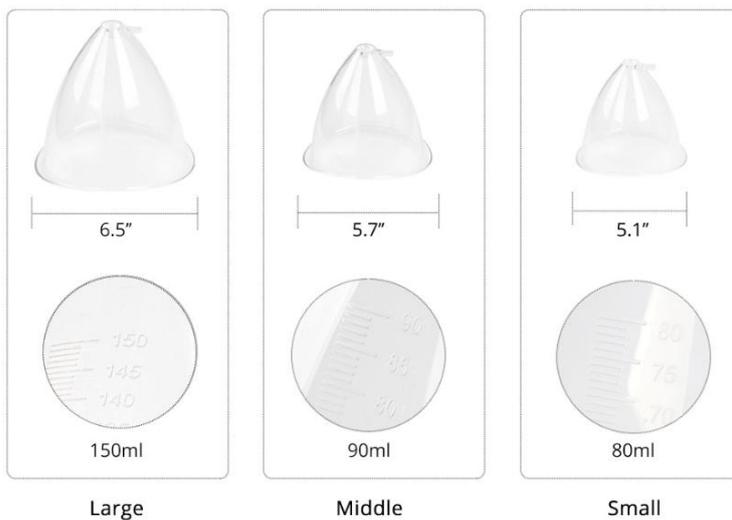

or into

Note: 1. After the device is on, the two vacuum cups has the same suction. Only when the 2 cups touching the skin, can the skin feel the suction. 2. If only one cup needed

(when walking the cup), tie the other rubber hose to a knot to avoid air leakage, then you can operate with one cup. Untie the knot if two cups are needed.

to a knot

3 pairs of breasts enhancement cups

9 pairs of vacuum cups

- Cup ① is suitable for those who have big breasts and need shaping.
- Cup ② is suitable for those who need concentrate and breast enhancement.
- Cup ③ is suitable for those who need massage and relaxation.
- Cup ④ is suitable for those who need cupping, walking cups (on large treatment area such as legs, buttocks, abdomen)
- Cup ⑤ is suitable for those who need cupping, walking cups (on legs and back).
- Cup ⑥ is suitable for those who need cupping, walking cups (on small treatment area such as arms and calf).
- Cup ⑦ is suitable for those who need walking cups (on neck or arms).
- Cup ⑧ is suitable for those who need walking cups, massage (on face and neck).
- Cup ⑨ is suitable for those who need walking cups, cleaning (on face).
- Cup ⑩ is suitable for those who need private part treatment.
- Cup ⑪ is suitable for those who need facial cleaning.
- Cup ⑫ is suitable for those who need walking cups, cleaning.

3 grease cups, select cup

according to the treatment are.

The big cup is suitable for big treatment area, such as arms, abdomen, waist, buttocks, legs, and back.

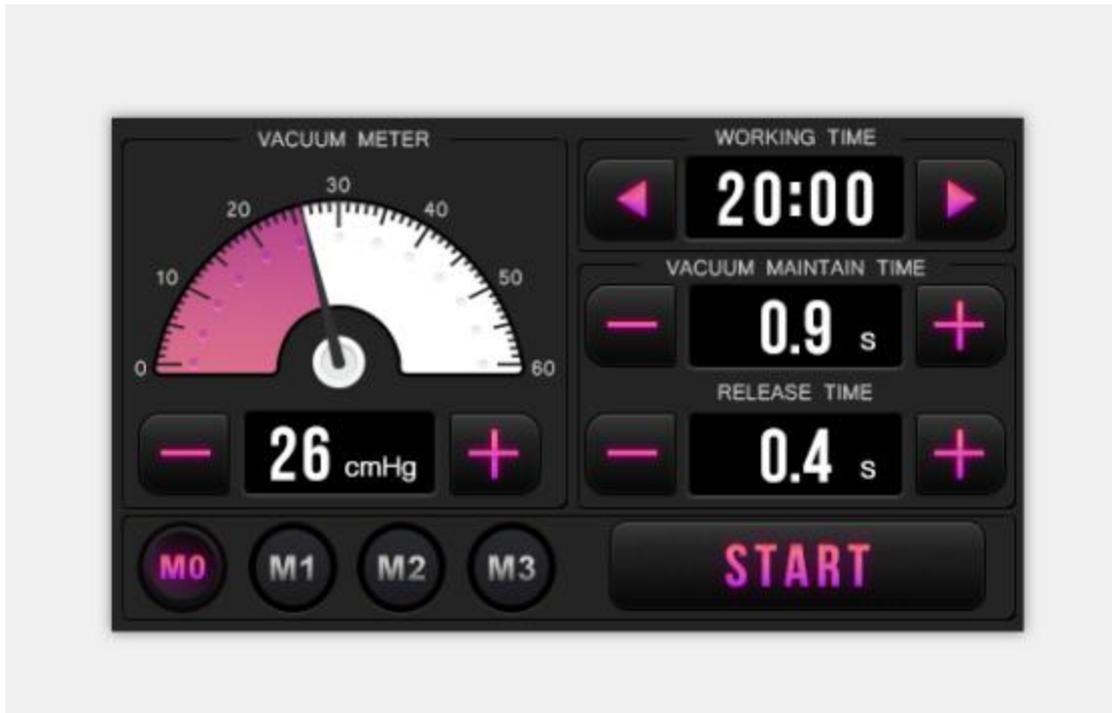

The middle cup is suitable for face and body treatment, such as arms, neck, face, and calf.

The small cup is suitable for small treatment area, such as face, eyes, forehead, chin, and neck.

After checking that the instrument is connected properly, the following starting interface will appear when the power supply is turned on.

## Mode Selection

Working Time +/-

Vacuum Meter (Click "+" "-" to adjust suction). "10" is suggested for beginners. The bigger the value, the stronger the suction, the tighter the feel. Add up the suction after adaption.

Vacuum Modes. Select according to one's comfort level.

Direct Suction Mode. After clicking M0, the vacuum cup is in a state of constant suction, which is suitable for those who opt for breast enhancement,

buttocks enhancement, cupping, detoxification, and body-shaping.

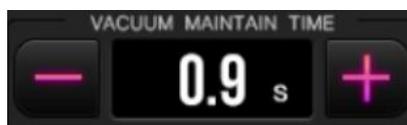

Soothing Mode. It is fast intermittent mode, suitable for those who opt to massage and relax, or the beginners.

Detoxification Mode. It is slow intermittent mode, suitable for those who opt for detoxification, dredging, or reliving muscle pain.

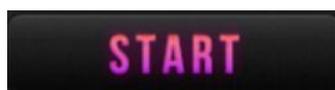

Lifting Mode. It is the slowest intermittent mode, suitable for those who opt for lifting, firming, and partial body-shaping.

Suction Time +/- . It refers to the interval period of the suction. The bigger the value, the longer the suction. It is suggested to adjust the suction at 0.5-1.5, and make it higher than release.

Release time +/- . It refers to the interval period of the release. The bigger the value, the longer the release. "0" means direct suction mode. It is suggested to adjust the suction lower than release.

Start/Pause

## 2. Technical Parameters

Power: 12W

Vacuum: <-80kPa

## 3. Safety Precautions

Patients with the following symptoms should be cautious about using this instrument. Please consult a doctor or a professional before using the instrument. The details are

as follows:

1. Those who are pregnant or lactating.
2. Those with heart disease or who are equipped with pacemaker.
3. Those whose wounds have not healed and who are recovering from the operation.
4. Those with epilepsy, severe diabetes and hyperthyroidism.
5. Those with malignant tumor, hemophilia or severe bleeding.
6. Those with skin diseases and infectious diseases.
7. Those who are sensitive to current.
8. Those with severe stomach, intestine, liver diseases, or bladder stone, kidney stone.

#### **4. Dos and Dont's**

1. Use a grounding pin and make sure the power socket of the device is properly connected before each operation.
2. Ensure that the voltage of the device is appropriate. If the voltage of the local power supply is unstable, we recommend that users increase to the matching power voltage.
3. In order to ensure the therapeutic effect and normal service life expectancy of the device, please use the specified accessories provided or recommended by the original manufacturer.
4. The device should not be placed in wet environment or near water, nor should they be directly exposed to sunlight.
5. Do not place the device near a strong heat source, because this may affect the life and normal use of the device.
6. Do not use it on those with breast implants.
7. Do not use it on those with metal implanted (IUD included).
8. Do not use it on those who are in pregnancy or lactation.
9. Do not use after drinking.
10. Do not use it on those who are in first 3 days of menstruation.
11. Do not use it on those who had an operation or cesarean within half a year.
12. Do not use it on those who had abortion within 3 months.
13. Do not use it on those who had eutocia within 2 months.
14. Pause if there's too much suction while operation, readjust the suction before operating again.
15. Do not wear any metal materials.
16. Make sure there's a cotton pad inside of grease cup before operation to avoid essential oil getting into the device and causing damage.
17. Clean the instrument with normal saline after operation to ensure its cleanliness and hygiene and prolong its service life.

#### **5. Troubleshooting & Solutions**

**1. The instrument cannot be started, but the key light on the back of the instrument does not work?**

- A. Make sure the power cord is connected to a valid power socket.
- B. Whether the fuse tube on the back of the instrument is loose or burnt out.

**2. The vacuum cup/grease cup has no suction or decreased suction?**

- A. Plug the transparent tube right if it is plugged properly.
- B. Check if there's foreign object or oil in intake and clean it.
- C. Check if the tube is broken especially at two sides, and replace it if it's broken.

## 6. FAQs

**1. Q: Does vacuum breast enhancement have side effects?**

A. Vacuum breast enhancement has no side effects. It adopts completely physical treatment. Massage and vacuum suction are the general principles for health care and physical therapy. This device combines high technology with the traditional treatments, which brings more obvious effects with no rebound or side effects.

**2. Q: How long can I start seeing results of RF treatment?**

A: Under normal circumstances within that day, the skin is smooth. Treat once a week for facial treatment, and you'll see a good effect after several courses.

**3. How to detoxify with vacuum?**

A: Vacuum engorges the blood capillary, stimulates cells vitality. The suction and release while operation opens and closes the pores, which boosts the skin breath, increase skin oxygen uptake, accelerate skin metabolism, so it works on invigorating blood circulation, dispelling coldness and dampness, dredging meridians, detoxification, purging heat, etc.

## 7. Packing List

- 1 x main machine
- 3 pairs of cups for breast
- 3 pairs of cups for cupping
- 6 Pairs gas cup for scrub
- 3\* Fingertip cups for rhythm massage
- 2 x shot connecting tubes
- 1 x long connecting tubes
- 1 x power line

## 8. Operational Diagrams

		<p>temple, lift canthus, 3 times.  10. Do the same on the other side.  11. Lift on forehead towards hairlines.  12. Apply mask, 15 min.  13. Remove mask, clean face, 2 min.  14. Apply toner, essence, cream, and sunscreen.</p>	
--	--	---	---

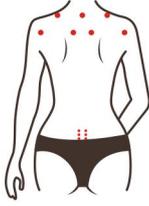

**Suggested Treatment:**

Ten treatments account for one full course. After one treatment, the skin tone will be nice, and blood circulation is accelerated. After one course, the skin starts to detoxify, and acne is improved, blackheads are reduced. Three courses help improve contour, build assistance, and the skin is glowing.

## Back Lymphatic Drainage: 60 min, once/week

**Suggested Treatment:**

6 treatments account for one full course. Once done, body is relaxed and there will be slight petechiae, which should disappear 3-5 days gradually. It is advised to receive one treatment per month for those with heavy petechiae and once every two weeks for those with slight petechiae. After a full course, body metabolism is accelerated. Body blockage such as constipation is reduced. After two courses, muscle stiffness and soreness will be improved. Body local blockage will be dredged as well. After three courses, sleep quality is bettered. Skin tends to be rosy. Body health and physique is strengthened overall.
