1.Overview

MagicCurve is the most popular fitness instrument for muscle building and body shaping, which can replace all the muscle building and body shaping treatment in salon, with easy operation it provides body shaping solutions for the users in need of slimming. MagicCurve promotes the continuous expansion and contraction of body muscles by stimulating the nerves, completing the ultra-passive training of muscles, which enables deep remodeling of muscles, the growth of myogenic fibers (muscle enlargement), generation of new collagen chains and muscle fibers (muscle hyperplasia), thus training and increasing muscle density and volume. This instrument is safe and effective, without side effects.

2.Precautions

- 1.This instrument is guaranteed by the designated after-sales service unit.
- 2.Use this product at ambient temperatures between 16°C and 35°C, do not place the instrument in a high-temperature environment, as this may affect the service life of the instrument and the normal use.
- 3.Clean the instrument after use and store it properly to extend its service life, do not use alcohol or alcohol contained product to wipe the instrument.
- 4.Always use the designated accessories provided or recommended by the original manufacturer to ensure the performance of the instrument and sustain its lifetime.
- 5.Do not use the instrument on the eyes, head, chest, back, thyroid, parathyroid, testicles, abdomen of pregnant women and pacemaker.
- 6.Remove off all the metal objects from your body to avoid unpredictable situation or affect the treatment before start.

7. Please turn off the power of the instrument when not in use, and make sure to turn off the general power of the instrument before leaving after daily use to ensure the safety of instrument.

8. It should not be used within six months of surgery or caesarean section, within three months of miscarriage, within two months of normal delivery, and not for women who are menstruating, pregnant or breastfeeding.

4. Technical parameters

Product number: WL-EMT97

Input: AC 100 V ~ 240 V 50/60 Hz

Standby Power: 50W

Maximum Output Power: 500W

The Power of Micro Motor: 0.2 W

Magnetic Induction: 6 Tesla

Screen Size: 10.1 inches

Pulse Shape: Biphasic Waveform

Dimension of Main Unit: 450*450*420 mm (L*W*H)

Dimension of the Whole Machine (including racks and handpieces): 570*450*640 mm (L*W*H)

Dimension of the Packing: 600*630*500 mm (L*W*H)

Net Weight (not including package) : 26.5 kg

Gross weight: 42kg

2.Manual Operation Interface

How to DIY your treatment?

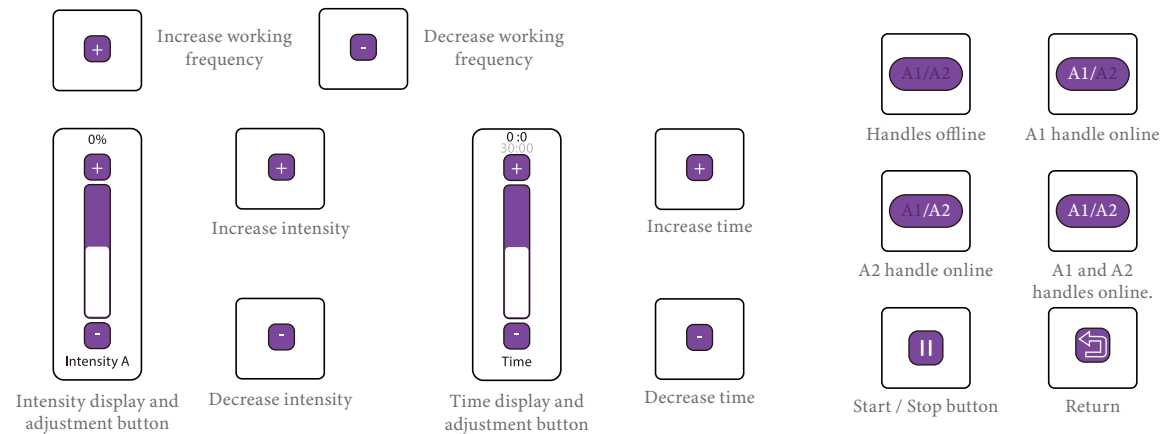

1.Tap Manual to enter DIY interface.

2.Set energy, time and frequency.

3.You can set 6 independent working modes in "F1, F2, F3, F4, F5, F6", the machine will work in the order of "F1, F2, F3, F4, F5, F6" according to the established program cycle until the end of the total treatment time.

For example

- 1.Set the energy, time and frequency as shown in the picture.
- 2.The machine will work at 70% intensity during the whole treatment.
- 3.The system will work according to the set data of F1 at 60Hz, after the working time of F1, the system will work according to the set data of F2 at 135Hz, after the working time of F2, the system will work according to the set data of F3 at 90Hz, after the working time of F3, the system will work according to the set data of F4 at 60Hz, after the working time of F4, the system will work according to the set data of F5 at 135Hz, after the working time of F5, the system will work according to the set data of F6 at 90Hz.
- 4.By the end of the working time of F6, the machine will work again in the sequence of F1, F2, F3, F4, F5, F6 until up to 30 minutes of treatment time.

Alert interface

7.Troubleshooting

1.Instrument fails to turn on?

- A.Check if the power cord is connected to a valid wall socket.
- B.Please check the fuse is loose or broken, the fuse is installed between the air vents (refer to the fuse replacement procedure in the Installation).
- C.If the above methods don't work, please contact the dealer for assistance.

2.No energy output from the instrument?

- A.Check if the handle is well connected with the main unit.
- B.Check whether the treatment area has been cleaned, grease or oily essential may cause poor contact between treatment head and human body, resulting in no energy output.

3.The instrument succeeded in starting up, but an error message appeared on the screen?

- A.Please unplug the power cord, and wait for 1 minute before plugging in the power cord again and restart the instrument.
- B.If the above method doesn't work, please contact the dealer for assistance.

4. On screen pops up "voltage too low" alert?

A. Try to restart the instrument, if the alert still exists, please contact the dealer for assistance.

5. On screen pops up "Abnormal output of voltage" alert?

A. Try to restart the instrument, if the alert still exists, please contact the dealer for assistance.

6. On screen pops up "The handle temperature is too high!" alert?

A. Power off the instrument and wait for 20 minutes to cool down the handle before restart using it.

B. If the alert pops up again in 30 minutes, please contact the dealer for assistance.

7. On screen pops up "Voltage too high" alert?

A. Please contact the dealer for assistance.

8. FAQ

1. Which parts of body can apply the treatment?

Answer: abdomen, buttocks, upper arms, legs.

2. How long does the treatment take?

Answer: the long-term manual operation is not required, simply set to Auto mode, select treatment area, fix the handle on the treatment area with strap, each session lasts 30 minutes.

3. Do I need to maintain a healthy diet after treatment?

Answer: you don't need to change your diet specifically, it would be helpful for metabolism if you could keep yourself hydrated, avoid overeating, spicy and greasy food.

4. Would I experience pain during the treatment?

Answer: no pains, no invasions, no anesthesia, you will feel like as engaging in strenuous exercise.

5. What the main effect of the treatment?

Answer: tone body, build muscle, resulting in a clear body contour.

6. Can I take the treatment at home?

Answer: Yes, the Auto mode is for home use.

9. Treatment introduction

1. Abdomen Muscle Building&Shaping

1. Efficacy

- (1) Tone the waist and abdomen to achieve flat and firm abs.
- (2) Muscle building and shaping, training abdominal muscles for clear contour, getting firm abs.
- (3) Increase skin elasticity, lift skin, improve stretch marks.
- (4) Tighten skin, improve sagging skin on abdomen and waist.
- (5) Accelerate metabolism, improve constipation and bowel movement.

2. Indications

- (1) People with undesirable abdomen and waist contours.
- (2) People suffering from stretch marks and sagging skin after delivery.
- (3) People with unattractive waist line due to a sedentary lifestyle.
- (4) People with constipation and discomfort on abdomen.
- (5) People who want to gain muscle, shape body and firm abs.

3. Steps (45 minutes)

Preparation: massage oil, hot towel, strap.

1.Clean abdomen
(better with a hot towel).

2.Massage with massage oil to relax
the waist and abdomen (15 minutes).

3.Clean the massage area.

(1)Parameters setting: choose Auto mode, set user's gender, age, height and treatment area, recommended parameters: Intensity A: 30-70%, Energy intensity A: 5-15, Time: 30 minutes, always start at the lowest level until you get used to it as a first-time user.

(2)Fix the handle on the treatment
area with strap.

(3)Tap Start button.

(4)At the end of the session, remove
the handle and untie the straps.

4.Handle application (muscle building and
body shaping, making firm abs) (30 minutes).

2.Arms Muscle Building&Shaping

1.Efficacy

- (1)Tone upper arms, resulting a clear arm contour.
- (2)Lift the skin, enhance skin elasticity, and improve skin sagging.
- (3)Accelerate blood circulation.
- (4)Muscle building and shaping, making clear body contour.

2.Indications

- (1)People who desire an improved appearance of their arms.
- (2)People with flabby arm skin.
- (3)People with sore and numb arm muscles.
- (4)People who want to have better body shape.

3.Steps (45 minutes)

Preparation: massage oil, hot towel, strap.

1.Clean arms (better with a
hot towel).

2.Massage with massage oil to
relax the arms (15 minutes).

3.Clean the massage area.

4

(1)Parameters setting: choose Auto mode, set user's gender, age, height and treatment area, recommended parameters: Intensity A: 30-70%, Energy intensity A: 5-15, Time: 30 minutes, always start at the lowest level until you get used to it as a first-time user.

(2)Fix the handle on the treatment area with strap.

(3)Tap Start button.

(4)At the end of the session, remove the handle and untie the straps.

4.Handle application (muscle building) (60 minutes, 30 minutes each left/right).

3.Buttocks Muscle Building&Shaping

1.Efficacy

- (1)Relax muscles, prevent muscle atrophy and relieve muscle spasm.
- (2)Relieve sagging caused by muscle relaxation.
- (3)Improve the sagging buttocks, firm the skin and increase the elasticity of the buttocks.
- (4)Tone and lift buttocks, clear the buttocks curve.
- (5)Activate the collagen regeneration of the lower pelvic floor muscle tissue, tighten the loose pelvic floor muscles, solve the problem of urine leakage and incontinence, and indirectly achieve the effect of vagina tightening.

2.Indications

- (1)People with sunken, flat, withered buttocks.
- (2)People with flat and shapeless butt.
- (3)People want to have better body shape.
- (4)People with excessive fat on their buttocks.
- (5)People with decreased estrogen levels and discordant sex lives.

3.Steps (45 minutes)

Preparation: massage oil, hot towel, strap.

1.Clean buttocks (better with a hot towel).

2.Massage with massage oil to relax the buttocks (15 minutes).

3.Clean the massage area.

4

(1)Parameters setting: choose Auto mode, set user's gender, age, height and treatment area, recommended parameters: Intensity A: 30-70%, Energy intensity A: 5-15, Time: 30 minutes, always start at the lowest level until you get used to it as a first-time user.

(2)Fix the handle on the treatment area with strap.

(3)Tap Start button.

(4)At the end of the session, remove the handle and untie the straps.

4.Handle application (lift and sculpt buttocks, tighten the pelvic muscles) (30 minutes each left/right).

4. Legs Muscle Building&Shaping

1.Efficacy

- (1)Tighten skin, prevent skin sagging.
- (2)Stimulate collagen regeneration and smooth stretch marks.
- (3)Enhance circulation in the legs and reduce edema.
- (4)Enhance the overall appearance of the legs.

2.Indications

- (1) People with poor circulation, edema in the lower body.
- (2) People with rough and saggy skin on legs.
- (3) People with a bad leg curve.
- (4) People seeking an improved appearance of body.

3.Steps (80 minutes)

Preparation: massage oil, hot towel, strap.

1.Clean legs (better with a hot towel).

2.Massage with massage oil to relax the legs (20 minutes).

3.Clean the massage area.

4

(1)Parameters setting: choose Auto mode, set user's gender, age, height and treatment area, recommended parameters: Intensity A: 30-70%, Energy intensity A: 30-70%, duration: 30 minutes, always start at the lowest level until you get used to it as a first-time user.

(2)Fix the handle on the treatment area with strap.

(3)Tap Start button.

(4)Remove the handle when the duration is over.

4.Handle application (body shaping)
(30 minutes each left/right).

10.Recommended treatment frequency

A course of treatment consists of 4 sessions. It is recommended to have 2 sessions per week, with each session lasting 45 minutes for each targeted area. After completing 1-2 courses, you will begin to notice visible effects. Optimal results are typically achieved after 6-8 courses. Following that, a maintenance course should be scheduled every 2-3 months to sustain the achieved results.

11.After treatment

(1)Avoid overeating, staying up late, drinking alcohol.

(2)Drink plenty of warm water to promote metabolism (drink 250-300ml right after treatment, and another 250-300ml 1 hour later after treatment, ensure 2500-3000ml for a day).

(3)Maintain a low-fat, low-salt diet, have more meals a day but consume less food at each, avoid high-calorie foods, reduce carbohydrate intake, and increase protein intake.
